

MAANG - A dream for many people

With technology advancing each day, companies need skilled workforce for its operations.

With such enormous market value, comes the value of data generated. Handling data with caution has become one of the priorities of many companies.

But when it comes to MAANG, data becomes a weapon.

WHAT'S MAANG ?

MAANG is the shortened name for Meta, Amazon, Apple, Netflix & Google.

Every one of us knows how big these companies are and what they offer to their employees.

Thus, getting into one of these is a dream for many as hiring process is very difficult to crack.

WHY MAANG?

Let's understand this in a different way. You are a developer and have good experience over a tech stack. You are currently working for some company XYZ who is paying you good and you are decently happy. I hope so... 😊

Then there are MAANG firms, who employ the same developers for only a small increase in compensation but with a plethora of additional benefits and allowances.

These extras come in a package known as CTC. Along with these things what the developer receives is the experience of working with a broad collection of people and having connections.

The working environment is also different in MAANG companies, in-fact they are well known for their work places.

COMING TO THE QUESTION IS IT REALLY THAT GOOD ?

To get the answers to this query you can see this video for reference and realize it yourself.

First here is the tour of Google Bay Area Office i.e. the Headquarter of Google

[Google HQ Tour \(Bay Area\)](#)

To be honest these things may seem materialistic to someone but when you work you would want to have a wonderful time doing your job.

MAANG not only provides these facilities to you but also to your family and some of them do have the option to bring your kids to work as they believe it improves work efficiency.

IS IT DIFFICULT TO GET INTO MAANG?

I honestly don't have the experience to share this with you all and so I have attached all the articles related to this topic for you all to explore.
